PIZZA BRICK

PIZZA BRICK

Play-to-Earn

by Binance Smart Chain

Pump up restaurants, bake pizza, play and earn real money

Pizza Brick is an economic investment game built on a decentralized smart contract by Binance Smart Chain.

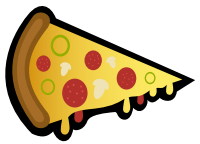
You build a chain of restaurants, increase the production of pizza and sell it for internal game currency.

Ovens in restaurants are able to bake a certain amount of pizza every hour, which can be collected every hour and sold for bricks for further development or converted to BNB.

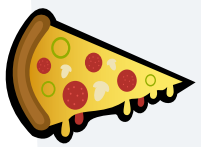
Get rewarded for every friend you bring to the game. Use the received resources to develop the restaurant business or withdraw profit.

Pizza Brick's unique offering is the ability to create your own lotteries or participate in brick raffles from other players.

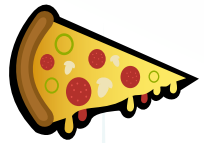
Info game



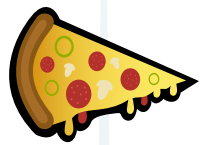
The restaurant is the main location where pizza is baked. At the same time, you can manage ten restaurants of different levels. The number and levels of restaurants affect the amount of pizza baked in one real-time hour. Each restaurant has 5 levels.



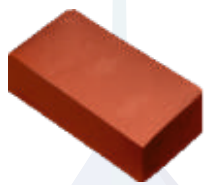
A restaurant **oven** bakes a pizza. It has an initial speed that will constantly increase throughout the game. You can take the finished pizza out of the oven at any time, but remember that each oven has its own volume. If you do not remove the pizza, after 24 hours the oven will be completely full and the production of pizza will stop.



Arena is a place where you can get Bricks with a 50% chance. For each play you will receive x2 Bricks from the cost of a game.



The lottery is an opportunity to create your own conditions for drawing Bricks among users based on luck.



Bricks are an internal currency that you can buy with BNB, generate and accumulate during the game, win and use for in-game needs, or withdraw also in the form of BNB.

Pizza baking volumes.
It is measured in hours

Live	Preview	Level 1	Level 2	Level 3	Level 4	Level 5
8		52000.0	63250.0	83500.0	108250.0	137500.0

Economy of the game

- Connect Crypto wallet and buy Bricks with BNB
- Buy and upgrade Restaurants, increase baking speed
- Collect daily pizza from Restaurants
- With the help of Bricks participate in the Arena and increase your profit x2 times
- Create lottery drawing rooms and participate in other players' drawings
- Make SWAP Pizza with Bricks or BNB. You can also sell your business

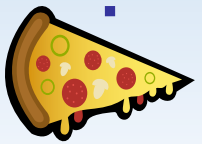
Oven Pizza

Inside the oven your pizza is kept and must be collected promptly to avoid the process from freezing. Perform an Oven Upgrade by using your Bricks to gain additional storage for the oven

	Bricks Required	Storage for Pizza
Level 1	0	24 Hours
Level 2	1000	30 Hours
Level 3	3000	36 Hours
Level 4	5000	42 Hours
Level 5	6000	48 Hours

Cooking speed

Through the use of bricks, you can gain new abilities and enhance the efficiency of your daily pizza production



You can UPGREDE at any time using Bricks

	Bricks Required	Upgrade
Level 1	0	0
Level 2	5000	0.1
Level 3	7500	0.2
Level 4	10000	0.3
Level 5	12500	0.4
Level 6	15000	0.5

PVP Arena

Arena — allows players to compete between restaurants using Bricks.

Regardless of the level of the Restaurant, each user has a 50% chance of winning.

Smart Contract automatically selects the winner and pays him the entire cash of the game.

The competition will be launched automatically, at the moment when another user of the platform also launches a game of a similar level of difficulty.

In **24** hours — one user will be able to conduct only **10** competitions.

WIN x2
